

**FOR MEN WHO WANT TO LIVE LIFE TO THE FULLEST**

Regenerative **Stem Cell** Procedure For Men

Using Your Own **STEM CELLS**  
to Treat  
**ERECTILE DYSFUNCTION**

## **Is CaverStem™ right for me?**

As with any medical condition, proper diagnosis and recommendations for treatment by an experienced and licensed physician is necessary. Consult with your physician.

## **Whose Stem Cells are used?**

The physician ONLY uses your own stem cells and DOES NOT alter, manipulate or store your stem cells.

## **Where do the Stem Cells come from?**

Your Bone Marrow, which is a rich source of stem cells with regenerative capabilities.

## **Who performs the procedure?**

The CaverStem™ procedure is performed only by physician's.

## **Is Anesthesia used?**

No. The procedure is minimally invasive and does not require general anesthesia. We use a local anesthetic solution (lidocaine) to numb your skin. An oral sedative is also given to reduce anxiety.

## **Is it painful?**

Most patients report feeling mild pressure during the injection and mild soreness in the area treated.

## **How long is the recovery?**

You will be able to resume your normal daily life immediately, limited by the minimal degree of swelling and mild soreness that may be experienced after the procedure.

## **Has CaverStem been tested?**

Yes, patients have been treated using the CaverStem™ procedure under strict clinical trial guidelines in the U.S.

## **ERECTILE DYSFUNCTION?** You're Not Alone

**“Over 30 million men in the U.S.  
suffer from Erectile Dysfunction”**

**“Over 9 million men in the U.S.  
don't respond to Viagra & Cialis”**
